

SHIRAPTINATH C R

Software Engineer · Building AI-powered products shipping faster and make real impact
9842644796 | shirapti27@gmail.com | linkedin.com/in/shirapt | github.com/shiraptinath

PROFESSIONAL SUMMARY

Software Engineer with a Gold Medal in CS and hands-on experience building end-to-end systems from autonomous AI-powered data science pipelines to real-time multi-user applications. Passionate about leveraging AI to eliminate manual workflows, accelerate development cycles, and ship higher-quality products with meaningful impact.

TECHNICAL SKILLS

Languages & Frameworks: Python, Java, FastAPI, Flask, Streamlit

Database: SQL, Vector Databases.

AI / ML: Scikit-learn, Pandas, NumPy, Matplotlib, LangChain, Hugging Face Transformer, GenAI, Agentic AI.

Tools & Platforms: GitHub, VS Code, Google Colab, OpenClaw, Grok API, Kaggle, AWS, Cursor.

PROFESSIONAL EXPERIENCE

Technical Instructor - Examevoke, India

Aug 2025 – Feb 2026

- Designed & delivered 40+ hours of curriculum in Python, JavaScript, Data Analytics, and SQL to 60+ students across 3 batches, aligned with industry standards.
- Built practical assessment modules and project-based exercises bridging academics and real-world employability.
- Mentored students through interview preparation and placement guidance, improving technical readiness and confidence.

PROJECTS

AutoDS - Autonomous AI-Powered Data Science Agent

- Engineered an end-to-end autonomous AI agent that accepts any raw dataset and automatically performs data cleaning, feature engineering, EDA, model development, and visualization - eliminating manual coding entirely.
- Reduced data science project setup time by 80%; users upload a dataset and receive a full analysis report, model metrics, visualizations, and plain-english recommendations in one shot.
- Integrated LLM-powered natural language reporting - generates plain-english insights, model explanations, and next-step recommendations tailored to each dataset automatically.

AI-Powered Resume Analyzer

- Built a full-stack AI career platform combining resume analysis, LinkedIn optimization, cover letter generation, and an interactive tech career explorer and calculates ATS Score and gives feedback what to improve and recommendations to improve.
- Developed a Career Exploration engine where users filter by tech domain (Software Engineering, AI/ML, DevOps, etc.), browse AI-generated career roadmaps, and get their resume automatically tailored to their chosen career path - creating a seamless end-to-end job search workflow.

EDUCATION

M.Sc. Data Science & Artificial Intelligence

Sept 2025 – Present

Birla Institute of Technology and Science (BITS), Pilani

B.E. Computer Science & Engineering

Oct 2021 – May 2025

K. L. N. College of Engineering

CGPA - 8.13/10 (Gold Medal)

ACHIEVEMENTS

- Ranked #290/1349 in the **Orchestrate by HackerRank** - A 24 hours hackathon to build and ship an AI Agent in real time.
- NPTEL STAR at IIT Madras - Recognised for exceptional technical learning · LinkedIn Top Voice 2024
